ABOUT THIS WEBINAR

In this webinar, we'll hear from Linda Diamond, founder and former president of California-based, Consortium on Reaching Excellence in Education (CORE)®. Linda will speak from both the research and her broad experience with the science of reading-aligned instruction, in parallel with teacher practice, which can transform student learning.

ABOUT LINDA DIAMOND

Linda is the founder and former president of CORE, a professional learning organization that serves schools, districts, and state agencies in improving literacy and math achievement for all students.

Ms. Diamond is the author of three widely used professional books for educators: *Teaching Reading Sourcebook*, *Assessing Reading: Multiple Measures*, and *Vocabulary Handbook*.

Before her work at CORE, she served as a K–12 district administrator, a middle school and elementary principal, a high school teacher, and a senior policy analyst in an education think tank. She is now spending part of her retirement overseeing the National Council on Teacher Quality's revision and implementation of the Reading Foundations standards portion of the Teacher Prep Review.
